Guiyang fosters quality growth
Deep integration of advanced technology, industries key to sustainable development

BY YAN SHENGGAO

As a key hub for land- and sea-transport in West China, Guiyang, in the quality of living, is aiming to strengthen itself as an engine for growth, energy and a model of quality development by deepening big data and artificial intelligence, opening up and boosting pillar industries such as big data, local officials said.

Chen Yan, mayor of Guiyang, said the city has given full play to the advantages of its climate, geography, and economic conditions, positioning itself as a hub of big data and artificial intelligence. "While strengthening and optimizing big data industries, it has insisted on the deep integration of big data and the real economy as its main direction." 

Guiyang is the capital of Southwest China's Guizhou province.

Chen, mayor of Guiyang

Chen said Guiyang has also proposed international rules to improve management, technology, research and development and production. 

According to the Guizhou Statistical Bureau, the city's GDP reached 463.96 billion yuan (67.09 billion dollars) in 2019, an increase of 7.4 percent year-on-year. It has been awarded the title of Best Performing City for four consecutive years.

Since its establishment in Gui­ yang in 2013, the company has man­ aged to develop the cloud comput­ ing, using cutting-edge comput­ ing, innovations, and creating a innovative cloud computing ser­ vice platform that links data, applica­ tions and people.

Liao Chengchen, a representa­ tive of the National People's Con­ gress and a technician of the Power Supply Branch of Guizhou Power Supply, said the success of Guizhou Power Supply has set an example for other regions such as the United States, the United Kingdom, Italy and South Africa, with an export ratio of over 35 percent.

Another example is Guiyang Tire, which focuses on the in-depth integration of big data and the manufacturing industry.

"The real economy is the founda­tion of the high-quality eco­ nomic development," Chen said.

The total investment of the project is 640 million, with an annual output of 12 million all-steel radial tires and 800,000 off-the-road tires.

"Building a factory in Vietnam means that Guiyang Tire has taken a first step on the road to becoming an international enterprise," said Pu Xiaobo, deputy secretary of Guiyang Tire's Party committee.

The future, Guiyang Tire, will continue to promote the in-depth integration of industry and data, which encourages the compa­ ny to introduce international rules to improve management, technol­ ogy, research and development and production. 

"Our business is the most basic and fundamental," Liao said.

Guiyang Tire has more than 2,000 employees in its head office with a minimum diameter of 12 inches and a maxi­ mum diameter of more than 51 inches.

It can produce more than 2,000 varieties, which are widely used in agricultural, mining, desert and other special vehicles.

Liao said the success of Guizhou Power Supply has set an example for other regions such as the United States, the United Kingdom, Italy and South Africa, with an export ratio of over 35 percent.

During the novel coronavirus outbreak, Baishan Tire is inseparable from its technology industries in Guizhou.

"Our business is the most basic and fundamental," Liao said. 

"One business is the most basic and fundamental, although it is not related to one another," Liao said.

Guiyang Tire now has more than 2,000 tires models with a minimum diameter of 12 inches and a maximum diameter of more than 51 inches.

"Building a factory in Vietnam means that Guiyang Tire has taken a first step on the road to becoming an international enterprise," said Pu Xiaobo, deputy secretary of Guiyang Tire's Party committee.

The future, Guiyang Tire, will continue to promote the in-depth integration of industry and data which encourages the company to introduce international rules to improve management, technology, research and development and production.

For example, we launched a Guiyang Reservation Projects national technical and commercial demonstration project, a one-time reservation service for technological innovation in the city, he said.

It is one of the most complete and advanced commercial tire manufacturers in the world and the largest supplier of military tires as an original equipment manufacturer in China. Its products are exported to more than 120 countries and regions such as the United States, the United Kingdom, Italy and South Africa, with an export ratio of 35 percent.

Guiyang has been committed to improving management, technology, research and development and production.

It can produce more than 2,000 varieties, which are widely used in agricultural, mining, desert and other special vehicles.

Liao said the success of Guizhou Power Supply has set an example for other regions such as the United States, the United Kingdom, Italy and South Africa, with an export ratio of over 35 percent.

The future, Guiyang Tire, will continue to promote the in-depth integration of industry and data, which encourages the company to introduce international rules to improve management, technology, research and development and production. 

For example, we launched a Guiyang Reservation Projects national technical and commercial demonstration project, a one-time reservation service for technological innovation in the city, he said.

Statistics showed that Guiyang leads the provincial commodity parks, attracting more than 1.6 billion yuan in investment.

To further cultivate cross-region­ al, development-oriented big data, the two sides will work together to complete the construction of big data centers for China State Rail­ way Group, the People’s Bank of China and the Ministry of Public Security.

Additionally, Guizhou National High-tech Industrial Development Zone and Guizhou Economic-Techno­ nological Development Area will set up branches in Guian New Area.

Efforts will also be made to develop big data services in the two areas so that residents in the two regions can enjoy greater conveniences.
