

National-level Development Zones

Tianjin Economic-Technological Development Area (TEDA), established in 1984, is one of the first national-level development zones approved by the State Council, positioned as the center of Tianjin's advanced manufacturing R&D base and the core area of BHNA, focusing on the layout of new-generation information technology, chemical new materials, automotive and high-end equipment, and biomedicine industries.

Tianjin Port Free Trade Zone, established in 1991, is the first free trade zone in northern China approved by the State Council, positioned as a world-class free trade park and an open hub-type port and airport economic zone, focusing on the layout of international trade, port logistics, high-end equipment manufacturing and food industries.

Tianjin Binhai Hi-tech Industrial Development Zone, established in 1988, is approved by the State Council in 1991 to become one of the first national high-tech zones, positioned as a world-class high-tech park, focusing on the layout of new-generation information technology, biomedicine, new energy, high-end equipment manufacturing and modern service industries.

Tianjin Dongjiang Free-Trade Port Zone, established in 2006, is positioned as the core functional area of the northern international shipping center and international logistics center, the national leasing innovation demonstration zone, and the national import trade promotion innovation demonstration zone, focusing on the layout of financial leasing, online freight, commercial factoring, platform economy and port-adapted industries.

China-Singapore Tianjin Eco-City, established in 2008, is a major strategic cooperation project between the Chinese and Singaporean governments and the world's first eco-city developed through international cooperation, positioned as a national green development demonstration zone, focusing on the layout of intelligent technology, cultural tourism, medical health, green buildings and green high-end manufacturing industries.

Binhai New Area

BHNA at a glance

BHNA (Binhai New Area) is located in the North China Plain, facing the sea to the east, across the sea from Japan and South Korea, with a coastline of 359 kilometers, an area of 2,283 square kilometers, and a wetland area of 674 square kilometers. BHNA is one of China's economically developed and highly internationalized national-level new areas, administering 5 national-level development zones and 21 townships, with a population of around 2.44 million.

BHNA has a warm temperate monsoon climate with distinct seasons, an average temperature of 14°C, and annual precipitation of 782.6 millimeters. The three major wetlands, including the Tianjin Beidagang wetland nature reserve, cover an area of 674 square kilometers. Five rivers, including the Haihe River, flow through the new area into the sea. Various migratory birds, such as the Oriental white stork and Larus relictus, inhabit and forage around the area. BHNA is rich in oil and natural gas resources, with the Dagang Oilfield on land and the Bohai Oilfield at sea, leading China in crude oil production.

Transportation

BHNA has convenient transportation by land, sea, and air. As one of the world's top ten ports, Tianjin Port connects to over 500 ports in more than 180 countries and regions, with an annual container throughput exceeding 23 million TEUs. Tianjin International Cruise Home Port is the first and largest cruise home port in northern China. Tianjin Binhai International Airport is a major airport in China, offering 161 domestic and international passenger routes. It is also the cargo hub for northern China's aviation. BHNA has four high-speed railway stations with lines connecting to Europe. In addition, 15 expressways run through the area, and the Beijing-Tianjin Intercity Railway reaches Beijing in one hour.

Culture and Tourism

BHNA has numerous cultural facilities, including libraries, art galleries and museums, as well as large performance venues and art troupes. The Dagukou Fort Ruins Museum, the old site of Tanggu South Station, the Ruins of Beiyang Navy Daku Dockyard and the old site of the Yellow Sea Chemical Industry Research Society are all part of the China National Key Cultural Relics Protection Unit. BHNA receives over 25 million visitors annually. The "Seaside Living Festival" has become a well-known cultural tourism brand in the Beijing-Tianjin-Hebei region. Binhai Library, National Marine Museum, Chow Tai Fook Financial Center, Binhai TEDA Aircraft Carrier Theme Park, Dongjiang Bay Beach and Tianjin Haichang Polar Ocean Park have become popular attractions.

Cover: Tianjin Port

Economy

BHNA is the largest advanced manufacturing R&D base in northern China, with a regional GDP exceeding \$100 billion, housing 380,000 market entities and more than 80 enterprises with revenues over \$1.4 billion. Global Fortune 500 companies have invested over 2,000 projects in BHNA. The area is known for its eight pillar industries: intelligent technology, aerospace, equipment manufacturing, green petrochemicals, automotive, biomedicine, new energy and new materials.

BHNA is home to over 50 listed companies and over 4,900 national high-tech enterprises, with more than 30 national key laboratories and research centers.

Aerospace is a key innovation industry in BHNA, which is home to production facilities for the Long March rocket family, the Tiangong space station and the Airbus A320 Family. The National Supercomputing Center provides powerful computing services for global enterprises. The China (Tianjin) Pilot Free Trade Zone was established here in 2014, taking the lead in aligning with international standards in areas such as rules, regulations, management and standards, with an average actual utilization of foreign investment exceeding \$2 billion per year and an average import-export volume exceeding \$27 billion annually.

Education and Sports

BHNA has over 480 schools, including universities, secondary schools, primary schools and kindergartens, with 308,000 students enrolled. Educational expenditure accounts for about 15% of total government spending in BHNA. The area is home to quality higher education facilities such as Tianjin University of Science and Technology and Tianjin Juilliard School. The TEDA Football Stadium is the first FIFA-certified professional football stadium in China and serves as the home ground for the Tianjin Jinmen Tiger FC. Annual events include dragon boat races, marathons, beach volleyball and the China Chess Open.

Healthcare

BHNA has more than 50 public medical institutions, including 10 national-grade hospitals and 45 community health service centers and public health institutions. It achieves a ratio of 5.3 hospital beds and 3.6 physicians per 1,000 people, and 3.39 nurses per 1,000 people. TEDA International Cardiovascular Hospital has successfully performed "HeartCon" implantation surgeries on more than 50 heart failure patients, bringing them new life. In collaboration with Peking University Health Science Center, Peking University Binhai Hospital has advanced medical projects in critical care medicine and orthopedics, reaching a leading level in China.

Vision

BHNA has over two thousand years of human settlement history, characterized by patriotism, innovation, industry and maritime element. The Self-Strengthening Movement and the modernization process of 19th-century China began here, representing the birth of the modern chemical industry in China through salt and alkaline manufacturing.

BHNA is a city with long-term development plans. It will deepen regional exchanges and cooperation with Beijing and Hebei Province, continuously advance reform and opening up, encourage fair competition, promote technological innovation and industrial agglomeration, protect the ecological environment, explore green and low-carbon development, strengthen the integrated development of ports and cities, and improve urban infrastructure. BHNA will continuously enhance urban management levels, create a law-based, clean and efficient government, and foster an international first-class business environment.

A stylized illustration of a port scene. In the foreground, a large green gantry crane stands on a pier. Below it, several colorful shipping containers (blue, green, yellow, white, and red) are stacked. To the right, a portion of a black and red ship is visible, with white smoke or steam rising from its funnel. In the background, two white wind turbines are visible against a blue sky with a single white cloud. The water is a solid blue color.
